Sindh Union Council and Community Economic Strengthening Support (SUCCESS) Programme

Approaches and Methodologies for Socio-Economic Surveys (SES): Baseline and End-line

Version 1.0

March 2016

UNIVERSITY OF
MANNHEIM

Acknowledgment

The document is a product of various consultative meetings with the senior staff members of SUCCESS partners RSPs (NRSP, SRSO, TRDP, RSPN), Heads of the M&E sections of SUCCESS partner RSPs, and extensive inputs from Dr. Andreas Landmann, Assistant Professor, University of Mannheim, Germany. During these consultative meetings all of the participants provided valuable feedback based on their on-ground experience of working with local communities and their technical expertise. The authors are indebted to their contribution.

The authors have also benefited from the existing baseline surveys and questionnaires of RSPN, RSPN/RSPs SUCCESS programme documents and the decision document of SUCCESS signed between EU and Government of Pakistan. The authors have also benefited from the guidance of EUD representatives at the EUD Pakistan office through meetings and discussions. The authors sincerely thank them all.

1. PRELIMINARY

1.1. Introduction to the SUCCESS Programme

- (1) The Sindh Union Council and Economic Strengthening Support (SUCCESS) Programme builds upon the experiences of the Union Council Based Poverty Reduction Programme (UCBPRP) of the Government of Sindh (GoS). SUCCESS is aiming to support the GoS in developing its local Community Driven Development (CDD) policy, allowing for a wider geographical outreach and providing financial means to impact poverty reduction in rural Sindh. The specific objective of the SUCCESS Programme is to reduce poverty through undertaking a CDD based approach on RSPs' proven social mobilisation model. Living conditions are expected to improve by building local social capital for better access to basic social and economic services and providing access to income generating and diversification activities.
- (2) The SUCCESS Programme is funded by the European Union (EU) and will be implemented by the Rural Support Programmes Network (RSPN) and its three member RSPs working in Sindh, namely, Sindh Rural Support Organisation (SRSO), Thardeep Rural Development Programme (TRDP), and National Rural Support Programme (NRSP). The SUCCESS Programme will cover eight out of the 24 districts of the Sindh province for a period of six years starting in October 2015.
- (3) The eight SUCCESS Programme districts include: Tando Muhammad Khan, Sujawal, Matiari, and Tando Allahyar with NRSP, Larkana and Kambar Shahdadkot with SRSO, and Dadu and Jamshoro with TRDP. The remaining districts of Sindh will be supported by GoS in a phased manner. The overall budget of the programme is EUR 82.13 million with a contribution of EUR 4.63 million from the implementing partner RSPs and RSPN and rest from the EU.

1.2. Objectives of the SUCCESS Programme

Following are the key objectives of the SUCCESS programme:

- (1) From 2018 onwards the Government of Sindh implements a policy to finance community-driven local development initiatives, in partnership with Community Institutions (CIs).
- (2) To stimulate community-driven local development initiatives through the Rural Support Programmes' approach.

These objectives will be achieved through the following four Expected Results (ERs):

- (1) ER 1: Approximately 770,000 rural households in eight districts mobilised and capacitated through people's own organisations (CO/VO/LSOs) of which at least 70 per cent will continue to function effectively at the end of the project.
 - (a) Mobilise 770,000 rural households and organise into 32,400 Community Organisations (COs), federate into 3,240 Village Organisations (VOs), 307 Local Support Organisations (LSOs), and 8 District LSO Networks (LSON). Provide grants to the CIs to be used as Community Investment Fund (CIF).
 - (b) Sensitised, train and capacitate community members on important numbers of topics – Health (Family Planning, Nutrition, EPI, HIV & AIDS), Education, WASH, DRR, Environment and basic civic rights.
 - (c) Engage with local authorities at Taluka and District level (through Joint development committees for both local authorities and community representatives) to advocate for access to essential public services and for planning, implementation and monitoring of local development plans.
- (2) ER 2: An average sustainable increase of poor household incomes by 30 per cent.
 - (a) 108,000 Community members, especially women, will be provided technical and vocational skills training.
 - (b) Farmers and livestock owners will be trained to adopt new technologies and/or be provided inputs to improve their food security and nutrition.
 - (c) The RSPs will identify and support innovative economic activities and access to efficient markets.
 - (d) Facilitate income generation of the communities' members.
 - (e) 25% of the poorest community members will benefit from a micro-health insurance
- (3) ER3: Increased economic and social services and community benefits from upgraded community infrastructures and productive assets operated and maintained with community involvement.
 - (a) 2,800 Community identified basic infrastructures will be built and maintained by communities.

- (4) ER4: A dedicated Sindh Province policy and budget framework for community-driven local development implemented from 2018 onwards.
 - (a) A high-level Strategy and Policy Dialogue Committee will be established by the Provincial Government of Sindh to oversee the implementation of SUCCESS, the government sponsored UCBPRP and other relevant interventions.
 - (b) Technical assistance attached to the high-level Strategy and Policy Dialogue Committee by EU

1.3. Socio-Economic Survey Development Process

A consultative approach was adopted with the aim of developing a survey that is based on shared expectations and joint ownership. The process started with a desk review of the existing surveys of RSPN, SUCCESS programme documents including, the programme logframe, RSPs proposals, grant agreements between EU and RSPs, and the decision document of SUCCESS signed between EU and Government of Pakistan. This was followed by various consultative meetings with the senior M&E staff members of SUCCESS partners RSPs and their focal persons for the SUCCESS programme and the Technical Advisor for SUCCESS research and M&E from University of Mannheim, Germany, Dr. Andreas Landmann. His input on the baseline methodologies and approaches and sampling methodology were incorporated. This final document is a product of these consultations held between the months of October 2015 to February 2016.

2.1 Purpose of the Socio-Economic Survey

The baseline and end-line Socio-Economic Surveys (SES) are part of the overall accountability and learning purpose of the M&E component of the SUCCESS Programme. The purpose and objectives of the SES are outlined as:

- (1) Estimate the change in the income, sources of income, asset ownership, incidence, depth and severity of poverty and associated social characteristics of the poor (households) in the targeted programme districts.
- (2) Estimate the change in targeted poor households' access to and use of public services, such as access to water and sanitation, education, health, civil acts registration, etc.
- (3) Estimate the change in the stunting rate of children less than 5 years of age in the targeted districts.

2.2 Approach of the Socio-Economic Survey (SES)

- (1) To ensure standardisation across three RSPs' programme districts, RSPN is developing a common methodology, indicators, data collection tools and guidelines for analysis and reporting.
- (2) To ensure independence, the implementing RSPs will outsource the baseline and end-line surveys to third party consulting firms. Given the nature of the programme, it is not possible to conduct Randomised Control Trials (RCT) or any other approach involving a deliberate control group; therefore the SES will only be able to measure the overall developmental change over the baseline, i.e. before and after approach will be adopted. Other options may include utilising individuals who chose not to participate in social mobilisation as an internal control group at the end-line phase. Controlling for different characteristics of participants versus non-participants, e.g. via matching techniques will be necessary. Another possibility is to analyse the effect of different program components (not everybody will receive the same intervention package), essentially using a similar matching process as for participants versus non-participants. For components that use Poverty Scorecard (PSC) based targeting, it will even be possible to use a Regression Discontinuity Design (RDD) and obtain credible impact estimates. All these options can be explored at the conclusion of the programme interventions in the endline survey given that these scenarios exist at the end of the programme once all the interventions are implemented.
- (3) The baseline will be conducted before the start of programme interventions (in 2016) and end-line after the completion of all programme interventions as per the programme timeline (in 2021).
- (4) The sample size must be sufficient and at random to draw conclusions that is representative of the SUCCESS programme districts.
- (5) The data and analysis is to be presented in a way that is disaggregated by gender, poverty and districts.
- (6) To achieve the three specific objectives of the SES outlined above, the survey data will be collected from the same sample households with separate modules to estimate each objective.

2.3 Methodology of Socio-Economic Survey

2.3.1 Methodology and Design of Survey

The surveys will mainly use quantitative methods and include qualitative information and analysis wherever possible. Due to programmatic limitation and unavailability of reliable controls the design of the assessment will be limited to measure overall development impact in the programme area using a before and after intervention design¹. Table 1 presents a summary of the objectives, key indicators, tools and survey methods for data collection.

¹ For a rigorous impact assessment the gold standard is to use Randomised Control Trials (RCTs), or – with less credibility – quasi-experimental designs and double difference techniques. Under SUCCESS programme none of these techniques are

Table 1: Survey Objectives, Key Indicators and Methods

Objectives	Key Indicators	Methods	Tools
Estimate the change in the income, source of income, asset ownership, incidence, depth and severity of poverty, with associated social characteristics of the poor people (households) in programme targeted districts.	<ul style="list-style-type: none"> - Demographic information (age, education status, health status, work status of household members) - Income levels and sources - Expenditure level and expenditure heads - Assets – quantity, value and ownership - Liabilities-loan amount and sources, debt amount and sources - Poverty incidence - Depth and Severity of poverty 	<ul style="list-style-type: none"> - Sample household (adult member) interviews using quantitative methods - Consumption based head count ratio/multi-dimensional poverty index - Sen's inequality index/Gini coefficient 	<ul style="list-style-type: none"> - Household roster - Household questionnaire
Estimated the change in targeted poor households' access to and use of public services, such as access to water and sanitation, education, health, civil acts registration, etc.	<ul style="list-style-type: none"> - Availability, use and sources of household facilities (water, sanitation, fuel) - Availability, access and use of public facilities (education, health, sanitation, civil acts registration etc.) 	<ul style="list-style-type: none"> - Sample household (adult member) interviews using quantitative methods - Public facilities access and use survey 	<ul style="list-style-type: none"> -Household questioner on access and use of public services - Village questionnaire on availability and functionality of public services.
Estimate the change in the stunting rate of under-5 year old children in the targeted districts.	-Stunting rate of under-5 years old children	- Targeted nutrition survey of under-5years children in the sample households	<ul style="list-style-type: none"> - Measurement of height and age of children - interviews with parents and children

2.4 Sample Framework

2.4.1 Sample Size Determination

feasible as in the target districts the programme intends to cover 70 % of the households and almost all of the poor households. In the neighboring districts government is also planning to take the programme to scale.

The power and sample size calculation follows from the evaluation objective formulated above. We intend to measure the change of several key indicators over time precisely enough to confirm a significant trend. We thereby take the following objectives as given:

- The sample share from each district should be roughly proportional to their number of Union Councils (see description of sampling below)
- Within the lowest sampling stage (the revenue village), about 50 households should be sampled in order to maximize cost-effectiveness of the survey logistics
- Analyses should result in sufficient precision when doing them *by district*
- Per district we want to be able to detect changes in indicators of roughly 20% relative to the baseline level. For extremely poor, we expect even higher effects.

Given that we want to evaluate changes over time, we need to compute sample sizes using paired samples. Note that observations can be expected to be correlated over time. Differencing out these common error components over time should result in lower standard errors. At the same time, there might be time-specific effects that are correlated within the village level. This should again increase standard errors compared to conventional levels. Combining both effects in power calculations is not trivial, but we believe that in our setting correlation of measurements over time should be at least as relevant as (time-specific) correlation within villages. In practice, we will therefore ignore both within village correlation and correlation over time and proceed with a simple version of the power calculations. We hence use the Stata command “*power twomeans*” (“*power twoproportions*” for binary variables).

The power calculation presented in Table 2 suggests that at least 388 observations per district should be obtained in order to reach an acceptable precision *per district*, thus a minimum sample of 400 households in each district will be taken. Those will suffice to detect significant changes of ten percentage points or even less. Note that the precision for analyses on the RSP or overall level will of course be higher.

Table 2: Power Calculations by district

	POVERTY HEADCOUNT	EXTREME POVERTY HEADCOUNT
MEAN AT BASELINE	0.50	0.32
MDES	0.10	0.09
MDES / BSL MEAN	20%	28%
N	388	386

Note: Power 80%, level of significance 5%. The outcome variables are defined at Using UNDP/OPHI's multidimensional framework (<http://www.ophi.org.uk/policy/multidimensional-poverty-index/>). Poverty rated from the eight target districts are taken from 2015-16 District level Clustered Deprivation data analysis (by Arif – SDPI) and averaged for an approximate baseline (BSL) mean. MDES = Minimum Detectable Effect Size.

In the following we calculate Minimum Detectable Effect Sizes (MDES) on the RSP (assuming N=1200) and overall level (assuming N=4000). Table 3 and 4 suggest that changes of about five percentage points in each RSP and of about 3 percentage points overall can be detected. This means that on higher levels the effects will be easier to detect, but the sample size still allows for some precision at the district level.

Table 3: Power Calculations by RSP

	POVERTY HEADCOUNT	EXTREME POVERTY HEADCOUNT
MEAN AT BASELINE	0.50	0.32
N	1200	1200
MDES	0.057	0.052
MDES / BSL MEAN	11.4%	16.3%

Note: Power 80%, level of significance 5%. The outcome variables are defined at Using UNDP/OPHI's multidimensional framework (<http://www.ophi.org.uk/policy/multidimensional-poverty-index/>). Poverty rated from the eight target districts are taken from 2015-16 District level Clustered Deprivation data analysis (by Arif – SDPI) and averaged for an approximate baseline (BSL) mean. MDES = Minimum Detectable Effect Size.

Table 4: Power Calculations overall

	POVERTY HEADCOUNT	EXTREME POVERTY HEADCOUNT
MEAN AT BASELINE	0.50	0.32
N	4000	4000
MDES	0.031	0.029
MDES / BSL MEAN	6.3%	9.0%

Note: Power 80%, level of significance 5%. The outcome variables are defined at Using UNDP/OPHI's multidimensional framework (<http://www.ophi.org.uk/policy/multidimensional-poverty-index/>). Poverty rated from the eight target districts are taken from 2015-16 District level Clustered Deprivation data analysis (by Arif – SDPI) and averaged for an approximate baseline (BSL) mean. MDES = Minimum Detectable Effect Size.

2.4.2 Sample Selection Process

Universe: All rural union councils within the eight targeted districts of (Matiari, Sujawal, Tando Allahyar, Tando Muhammad Khan, Jamshoro, Dadu, Larkana and Kumber-Shadad Kot) of Sindh are considered as the universe of this survey. Urban union councils are totally excluded as the programme will be implemented in rural union councils.

Sample Selection Strategy: In each district a three stage sampling will be used.

Stage 1: Selection of union councils

In districts where the total numbers of union councils are up-to 40 - two union councils will be selected at random. Where the total numbers of union councils are between 40 to 50, three union councils will be selected at random, and finally where total union councils number is more than 50 then four union councils will be selected. This guarantees that districts are represented roughly proportional to their number of union councils.

Stage 2: Selection of Revenue Villages

Within each selected union council, four revenue villages will be selected at random.

Stage 3: Selection of Households

A fixed number of 50 households will be selected from each sampled revenue village. Within the sampled villages all the households will be listed based on the poverty score band of below 23 score and rest. An equal proportion of sample will be selected on random from each category.

The following table presents the total number of UCs, Revenue Villages, households and corresponding number of samples. The same sampling plan will be repeated in the follow up survey at the end of the programme.

Table 5: Household Selection Break-up

RSP	District	No. of Talukas / Tehsils	Total No. of Union Councils	No. of Revenue Villages	Total Estimated Households 2015	No. of Sample UC	No. of Sample Revenue Villages	No. of Sample Households
NRS P	Matiari	3	30	107	86,895	2	8	400
	Sujawal	5	37	388	118,055	2	8	400
	Tando Allahyar	3	25	79	74,127	2	8	400
	Tando M. Khan	3	29	158	75,859	2	8	400
	Sub Total	14	121	732	354,936	8	32	1,600
SRS O	Larkana	4	47	180	157,546	3	12	600
	Kamber Shadadkot	7	43	248	145,848	3	12	600
	Sub Total	13	90	428	303,394	6	24	1,200

RSP	District	No. of Talukas / Tehsils	Total No. of Union Councils	No. of Revenue Villages	Total Estimated Households 2015	No. of Sample UC	No. of Sample Revenue Villages	No. of Sample Households
TRDP	Dadu	4	66	355	237,936	4	16	800
	Jamshoro	4	30	157	103,686	2	8	400
	Sub Total	8	96	512	341,622	6	24	1,200
	Grand Total	35	307	1,672	999,952	20	80	4,000

List of the selected sample union council using the above sampling methodology is attached at [Annex -I](#).

2.5 Survey Instruments

Household Questionnaire

To achieve the three objectives of the survey, the questionnaire will have three distinct modules.

Module I: Household Income and poverty

Structured questionnaires will be used containing information on socio-economic characteristics of the sample households. This module of the questionnaire will include the following content:

- i. age, education, profession of respondent
- ii. demographic composition of household (age and gender distribution)
- iii. work status of household members (by age and gender)
- iv. educational achievement of adults (by age and gender) including any technical/vocational skills training
- v. schooling of children (by age and gender)
- vi. health status of household members (by age and gender)
- vii. household income with sources of income
- viii. food consumption (by major commodities on a weekly basis)
- ix. household expenditure on different needs
- x. number and value of household assets (consumer durables, productive, and housing)
- xi. value of loans taken from informal and formal sources use of loans for different purposes (production, consumption, etc.)
- xii. household debt (loans outstanding at present)
- xiii. membership in any existing CO (duration, savings, etc.) and its benefits
- xiv. poverty scorecard indicators

Module II: Availability, accessibility and use of public sector social and economic services

The following contents will be included in this module:

- i. Housing facilities (house structure, drinking water and sources, drainage, electricity, fuel, etc.)
- ii. Availability, access and use of irrigation water
- iii. Availability, access (including, but not limited to state of building and facilities, expertise of teachers etc.) and use of education facilities
- iv. Availability, access and use of health facilities
- v. Availability, access and use agriculture extension services
- vi. Availability, access and use of civil act registration services (such as birth, death, marriage, CNIC, and voter registrations)
- vii. Identification and perceptions of major problems at the household and village levels by men and women

A separate village level questionnaire for each sample village will also be filled and this will include the following content:

- Availability and functionality of physical infrastructure
- Availability and functionality economic and social services
- Village prices
- Data on VOs and COs (where applicable)

Module III: Nutrition

To measure the stunting rate of under-5 year's old children, within the sample households all the children's height, weight and basic indicators associated with nutrition will be measured.

The draft questionnaires are attached in [Annex-II](#) these questionnaires will be refined and finalised after pre-test before the start of the baseline survey.

2.6 Analysis Plan for Baseline Survey

The baseline survey will have two purposes. First, it will provide the current situation and profile of sample households in the targeted district. Second, it will set a bench mark of the key indicators for the SUCCESS programme Logframe to measure the change at the end of the programme. The analysis of change can only be done after the follow up survey thus the baseline results will mostly focus on descriptive statistics with analysis of poverty.

Descriptive Statistics: Based on the household questionnaire and indicators identified in section 2.5 the descriptive statistics will include the following sections:

1. Socio-Economic Profile of Households
2. Status of households access and use of public social sector services
3. Status of availability and functionality of public social sector facilities available in sample villages and Union Councils

Poverty Analysis: The poverty analysis will include the following measure of poverty:

Incidence of Poverty: To calculate the incidence of poverty the commonly used measure of absolute poverty in developing countries, namely Head Count Ratio (HCR) - the proportion of the households/population with income per capita below the national poverty line defined by the Government of Pakistan is proposed. The poverty line income is the income level needed to meet basic needs. These basic needs can include simply a basket of food (providing a certain level of daily energy) or food with other goods that are regarded necessary for human existence.

The depth and severity of (income) poverty: This will be measured by using the following methods.

- a. *Poverty gap ratio* is the sum of income gap ratios of the population below the poverty line divided by the population of the poor:

$$PGR = 1/n \sum [(z - y_i)/z]$$
, where z is the poverty line income, y_i is the income of each poor person (indexed by $i \in (1, \dots, q)$) and n is the total population (poor and non-poor). PGR is an index of the income transfer required to get every poor person out of poverty.

- b. *Severity of poverty* takes into account the distribution of income among the poor and is measured by the squared proportionate poverty gap ratio:

$$SP = 1/n \sum [(z - y_1/z)^2 + (z - y_2/z)^2 + (z - y_3/z)^2 + \dots + (z - y_q/z)^2]$$
, where z is the poverty line income level, y_1 to y_q is the individual income level of the q poor persons. n is the total population (poor and non-poor).

Stunting Rate: This will include calculation of stunting rate for children of under-five year's age.

2.6.1 Suggested Table of Contents for the baseline report

The following table of content for the baseline survey report is suggested. However, this will be fine-tuned after the analysis of the survey data.

Executive Summary (1-2 Pages)

1. Introduction
2. Background of the SUCCESS Programme
3. Data Source and Methodology of Baseline Survey
 - a. Objective of the Survey
 - b. Evaluation approach

- c. Sampling strategy and Survey Instruments
 - d. Survey Limitations
 - 4. Short Profile of the District
 - a. Availability and functionality of Public Social Sector Services disaggregated
 - b. Access and use of Public Social Sector Services by Households
 - 5. Socio Economic Profile of Households in the district
 - a. Demographic structure of households and work status of households members
 - b. Adult literacy and schooling of children
 - c. State of health and physical environment
 - d. Household income: sources, distribution, and poverty
 - e. Household expenditure
 - f. Household assets: value and distribution
 - g. Household loans: amount, sources and uses
 - h. Household debt
 - i. Perceptions of problems segregated by male and female respondent
 - 6. Status of Nutrition (Stunting rate)
 - 7. Conclusion and recommendations of the baseline survey
 - 8. Methodology and plan for follow up Survey
- Annexes
- I. Terms of Reference
 - II. Data collection tools used in the baseline survey
 - III. Summary Statistics

2.7 Implementation of the Surveys

The surveys will be done by third party consulting firms. The RSPs will hire consulting firms through competitive bidding process.

Role of the third party firm: The consulting firm will be responsible for data collection, training of data collection team, pre-testing of data collection tools, develop manual for data collection team, data analysis and writing the survey reports. The data collection will be done through Computer Assisted Personal Interviews (CAPI) i.e. Tablet computers with customised software.

Role of RSPs: hiring of consulting firm and facilitate in the consulting firm in data collection. The facilitation will be limited to link the consulting firm data collection teams to the sample villages and households.

Role of RSPN and University of Mannheim: RSPN with technical support from the University of Mannheim Germany has designed the survey methodology and survey tools. RSPN M&E team will also participate in the training of consulting firms data collection team, participate in the consulting firm selection process and review the baseline and end-line survey reports and provide their input.

Annex – I: List of selected sample Union Councils

RSPs	Name of District	Name of Tehsil Taluka	Name of Sample Union Council	Number of sample Revenue Village	Number of Sample Households	Total Sample HHs
TRDP	Dadu	Taluka Dadu	Piyaro Station	4	50	200
	Dadu	Taluka K.N Shah	Boriri	4	50	200
	Dadu	Taluka Johi	Drigh Bala	4	50	200
	Dadu	Taluka Johi	Kamal Khan	4	50	200
	Jamshoro	Thano Bula Khan	Thano Arab Khan	4	50	200
	Jamshoro	Sehwan	Bhambha	4	50	200
SRSO	Kamber Shahdadtal	Nasirabad	1. UC Chaudero	4	50	200
	Kamber Shahdadtal	Kambar	5. Abri	4	50	200
	Kamber Shahdadtal	Shahdad Kot	1. Jamali	4	50	200
	Larkana	Larkano	No. 13 Kothi	4	50	200
	Larkana	Dokri	No. 41 Seehar	4	50	200
	Larkana	Bakrani	No. 36 Mahar Wada @ Dandano	4	50	200
NRSP	Matiari	Saeedabad	Faqeerabad	4	50	200
	Matiari	Matiari	Shah Pur at Arif Khatian	4	50	200
	Sujawal	Shah Bunder	Goongani	4	50	200
	Sujawal	Sujawal	Jar	4	50	200
	Tando Allahyar	Jhando Mari	Jhando Mari	4	50	200
	Tando Allahyar	Jhando Mari	Hingorani	4	50	200
	Tando Muhammad Khan	Tando Muhammad Khan	Rajo Nizamani	4	50	200
	Tando Muhammad Khan	Bulri Shah Karim	Saeed Khan Lund	4	50	200

Note: Note: The number of Revenue villages and household within the revenue village are tentative these numbers may change at the time of final sample. However, the districts and sample UCs within and total households in the UCs are final.

Sindh Union Council and Community Economic Strengthening
Support (SUCCESS) Programme

Socio-Economic Survey (SES)

(Baseline – 2016)

HOUSEHOLD QUESTIONNAIRE²

² The Questionnaire is being adopted from the PSLM 2007-8 questionnaires and amended according to the needs of the this survey.

Consent Form

My name is [name of enumerator] and I am representing [Name of Service Provider]. We are conducting a survey about socio-economic conditions of households and their access to public services [e.g.: drinking water, education, health facilities] in your area on behalf of [name of RSP]. The information we collect will help the [name of RSP] better understand the current socio-economic conditions of households and how access to public services affects the economic situation of households living in Sindh. There are no direct benefits to you for participating in this survey. However, the results of this survey will help the [name of RSP], government and other development organisation to develop programmes and policies for socio-economic empowerment of women and poor in Sindh.

Your household has been randomly selected for the survey, like many other households in this area. We will be asking questions about your household members, age, education, health, income and assets. We think that the whole discussion will not pose any risk to you and your household members. The interview usually takes about __ minutes. Your answers will remain confidential and will be used anonymously in the survey report. The survey results will not mention any names of you or your household members. Your views are important and will help to improve the work and knowledge of [RSP] and other organisations working for the development of Sindh.

We understand that sometimes some people choose not to participate in the survey for many reasons. You are free to choose whether or not to participate in this survey. If you do choose to participate, you are free to withdraw from the survey at any time. If you choose not to participate or you choose to withdraw, your decision will not adversely affect your position in community or relationship with [name of RSP] working in your area.

Authorisation

I have understood the consent form and decided that I will voluntarily participate in the study described above. Its general purposes, the procedures, and possible risks and benefits have been explained to me.

The consent taken from (Name): _____ Signature (if literate): _____ Date: _____

The consent taken by (Name): _____ Date: _____

Consent verified by (Name): _____ Signature: _____ Date: _____

Note: If the respondent is not literate the enumerator will take verbal consent and the Field Supervisor verifies that a verbal consent was obtained, by signing this document.

A. Household Identification

1	RSP Name	1. NRSP			2. SRSO			3. TRDP			<input type="checkbox"/>	
2	District	1. TMK	2. TAY	3. Matiari	4. Sujawal	5. Larkana	6. Kambar Shahdadt	7. Dadu	8. Jamshoro	<input type="checkbox"/>		
3	Tehsil/Taluka	[select from drop down]									<input type="checkbox"/>	
4	Union Council	[select from drop down]									<input type="checkbox"/>	
5	Revenue Village /Deh	[select from drop down]									<input type="checkbox"/>	
6	Village (Settlement)	[select from drop down]									<input type="checkbox"/>	
7	Household Address										<input type="checkbox"/>	
8	Name of Household Head										<input type="checkbox"/>	
9	Household Head CNIC											
10	Name of the Respondent										<input type="checkbox"/>	
11	Respondent CNIC											
12	Name of the Interviewer	[select from drop down]									<input type="checkbox"/>	
13	Name of the Supervisor	[select from drop down]									<input type="checkbox"/>	
13	Result	1. Completed with selected household					2. Completed with replacement					<input type="checkbox"/>
14	Behaviour of the respondent	1. Co-operative		2. Normal		3. reluctant/hesitant		4. non serious/talkative			<input type="checkbox"/>	

B. Household Demography and Political Participation

[Read]

Next, I would like to talk with you about your household and household member. A household corresponds to a person or a group of persons (either related or not) who habitually live in one house—whether it is fully or partially occupied, share expenditure and who cook in one cooking pot. One household might be composed of one or more families. I would like to talk about all the household members that are currently present or left for short period of time (less than 6 months). Please give the names of all members of your household. Start with head of the household. Please do not list guests or visitors:

IDC	Names of those household members who usually reside together and eat together (Write household head's name first)	1.	2.	3.		4.	5.	6.	7.	8.
		[Name] sex?	[Name's] Residential Status?	[Name's] Relationship with the Household head?						
		1= Male 2= Female	1= Present 2=Not present (temporarily)	1=Head 2=Son/daughter 3=Brother/sister 4=Grandfather/mother 5=Son/daughter in law 6=Father/mother in law 7=Brother/sister in law	8=Spouse 9=Father/mother 10=Grandchild 11=Nephew/niece 12=uncle/aunt 13=other relative 14 Not related		1=Has Birth Certificate/CNIC 2=Applied for Birth Certificate/CNIC 3=No Birth Certificate/CNIC	1= Unmarried 2= Married 3= Divorced 4= Widow 5= Nikah only	1=Yes 2=No	1=Hearing 2=Speech 3=Visual 4=Mental 5=Limb 6=other 9=None
...										
IDC	9. If above 18 [Name] is a registered Voter? Yes=1 No=2	10. If yes [Name] voted in the last Elections? Yes=1 No=2				11. Is [Name] active member of political Party? Yes=1 No=2	12. If No, main reason Was not available=1 Not interested=2 CNIC not available =3 No Use=4			
		National Assembly	Provincial Assembly	District Councillor	UC Councillor					

D. Household Health

ID C	1. Had [Name] been ill or injured during the last one year?	2. Was any one consulted during the illness?	3. Did [Name] saw any type of doctor for treatment?	4. How many times [Name] received such facilities during the last one year as mentioned in Q3?	5. Has [Name] faced any problem in seeing____? (Give maximum two answers)	6. Why [Name] did not seek medicines/medical facilities during the last one year? (Give maximum two answers)		Questions regarding the Household	
	7. Did any LHW come to this Household during the last 30 days?	8. Did any male/female of the household visit a health unit during the last 30 days?							
Use the corresponding ID as used in section B	1= Yes 2= No (If no then ask from next person)	1= Yes 2= No (Ask Q. No. 6)	1= Private Dispensary/Hospital/clinnic 2= Govt. Dispensary/Hospital 3= BHU/RHC 4= LHV/LHW 5= Hakeem 6= Homoeopath 7= Chemist 8= One who performs 'Dum' (spiritualism) 9= Other		1= Satisfied 2= Doctor not present 3= Staff non-cooperative 4= Lady staff not present 5= Lack of cleanliness 6= Long wait 7= Costly treatment 8= Staff untrained 9= Medicines not available 10= Unsuccessful Treatment 11= Other	1= Not required 2= Costly treatment 3= Far away 4= Unsatisfactory 5= Doctor not present 6= Staff non-cooperative 7= Lady staff not present 8= No cleanliness 9= Long wait 10= Staff untrained 11= Medicines not available 12= Other	1. How much was loaned out in the last 1 year?							49.												
How much was received back (including profits) during the last 1 year?							50.												
How much profit was received on this loan during the last 1 year?							51.												
How much money was received from a group insurance/ benevolent by any member of this HH during the last 1 year?							52.												

J. BALANCE SHEET FOR INCOME AND EXPENDITURE

ID CODE	Non-Farm Income (G-23) (Rs)	Expenditure Items	Expenditures (Rs.)
		5. ANNUAL HOUSEHOLD EXPENDITURE ON FOOD – SECTION H: PART- A (18-Col9)	
		6. ANNUAL HOUSEHOLD EXPENDITURE ON FOOD – SECTION H: PART- B (31-Col9)	
1. ANNUAL HOUSEHOLD NONFARM INCOME (F-23: 1+...N)		7. ANNUAL HOUSEHOLD EXPENDITURE ON NON-DURABLE GOODS/ SERVICES – SECTION H: PART-C (57-Col9)	
2. ANNUAL HOUSEHOLD AGRI INCOME (G1-28)		8. ANNUAL HOUSEHOLD EXPENDITURE ON NON-DURABLE GOODS/ SERVICES – SECTION H: PART-D (81-Col9)	
3. ANNUAL HOUSEHOLD LIVESTOCK INCOME (G2-23)		9. ANNUAL HOUSEHOLD EXPENDITURE ON DURABLE GOODS/ SERVICES – SECTION H: PART-E (95-Col9)	
4. TOTAL ANNUAL HOUSEHOLD INCOME (1+2+3)		10. ANNUAL TOTAL HOUSEHOLD EXPENDITURE (5+6+7+8+9)	
Validation Check			
First level check: Ratio (4/10)		Is the ratio > 0.85? Yes (Balance complete) No (Go to further balancing second level check)	
Second level check: Ratio (4+11+12)/10		Is the ratio > 0.85? Yes (Balance complete) No (Verify from the HH, why the expenditures are so higher than income and make necessary corrections)	
11. Assets Sold (Sec I):=(27 col C + 32Q3(sold)+ 32Q4)		12. Savings and loans taken (Sec I)=(36+37+39+41)	

K. Household Facilities (availability and access)

1. What is the residential status at present? 1=Personal residence, 2= On rent, 3=On subsidized rent, 4=Without rent	
2. How many rooms does your household occupy, include bed rooms and living rooms? (Do not count storage rooms, bath rooms, toilets, kitchen or rooms for business)	
3. Which material is used to lay roof of this building? 1= RCC/RBC; 2=Wood/Bamboo; 3= Iron/Cement sheets; 4=Other	
4. Which type of Structure the house has? Pucca=1; Katcha=2; P&K=3	
5. What is the main source of drinking water for the household? Piped water = 1 Hand pump =2 Motorized pumping / Tube well =3 Open well = 4 Closed well = 5 Pond =6 Canal / River / Stream = 7 Spring = 8 Other = 9 (For codes 2, 3, 4, & 5 → to Q-7. For codes 6, 7, 8 & 9 → to Q-9)	
6. How many hours each day is water normally available in the tap? (If less than one, put zero)	
7. Who installed the water delivery system? Govt., PHED, LG & RD, Municipality, District / Union council etc. =1 Community=2 household itself = 3 NGO, Private etc. =4 RSP=5 Don't know = 6	
8. Who look after this water delivery system? Govt., PHED, LG & RD, Municipality, District / Union council etc. =1 Community=2 household itself = 3 NGO, Private etc. =4 RSP=5 None = 6	
9. How much time is consumed on a round trip to fetch the drinking water? 1 – 15 Minutes = 1 16 – 30 Min. = 2 31 – 45 Min. = 3 46 – 60 Min. = 4 60+ Min. = 5	
10. Do you normally pay for water used by your household? Yes =1 No =2 (→ Q - 12)	
11. How much do you normally pay for one month water supply? Rs.	
12. Are you willing to pay for an improved water supply system? Yes = 1 No =2 Don't know =3	
13. What type of toilet is used by your household? Flush connected to public sewerage = 1 Flush connected to pit = 2 Flush conn. to open drain = 3 Dry raised latrine = 4 Dry pit latrine = 5 No toilet in the household = 6 (For codes 1 – 5 → Q- 16)	
14. Where do the household members go for their necessities? Fields / open places = 1 Communal latrine = 2 Others = 3 (specify)	
15. Is your house connected with drainage / sewerage system? Yes, underground drains = 1 Yes, to covered drains = 2 Yes, to open drain = 3 No system = 4	
16. How is the garbage collected from your household and neighbourhood? Municipality = 1 Privately = 2 No formal system =3	
17. How much do you pay (Rs.) per month for garbage collection from your HH and from the neighbourhood? (Write 0 if nothing is being paid)	
18. For how many hours per day do you have electricity? No connection=1 1-4 hours =2 >4-8 hours =3 >8-12 hours =4 >12-16=5 >16-20=6 >20-24=7	
19. Do you use any alternative sources of energy/electricity? Yes, UPS=1 Yes, Generator=2 Yes, Solar panels=3 Yes, Biogas=4 None =5	
20. What is the main source of fuel/energy? Gas=1;Wood =2; Kerosene oil=3; Saw dust=4; Other= 5	
21. What is the main source of water for irrigation? River=1, Canal=2, Tube well=3 Barani =4; other =5	

How much time is spent in reaching to the nearest place of facility																	
	A. Time in minutes					B. Normal mode of transport				A. Time in minutes					B. Normal mode of transport		
	0-14	15-29	30-44	45-59	60+	On foot	Non-mechanical	Mechanical		0-14	15-29	30-44	45-59	60+	On foot	Non-Mechanical	Mechanical

M. Major Constraints/Problems (Perceptions)

Problems	Male	Female	Problems	Male	Female	Problems	Male	Female	Problems	Male	Female	Problems	Male	Female
1.Education:			2.Health care:			3.Water Supply:			4.Drainage:			5.Street Pavement:		
6.Transport:			7.Fuel Supply:			8.Electricity:			9.Income (Poverty):			10. Jobs/Employment:		
11.Savings:			12.Access to Credit:			13.Social Cohesion:			14.Organisation:					

Rank each problem from 1 to 4, where 1=no problem; 2=slight problem; 3=serious problem; 4=very serious problem and 9= not sure.

N. Nutrition [Stunting³ and Wasting⁴]

If the family has children of 5 years of age then complete the following table, if not then move to next section:

Code	1. Name of Child	2. Sex (1=Boy 2=Girl)	3. Date of Birth	4. Age (Years)	5. Weight (kg)	6. Height (cm)	7. Birth Certificate (1=Yes 2=No)	8. Delivery Conducted by*	9. Breastfed (1=Yes 2=No)	10. Other substances*
...										

*Codes:
 Q8: Delivery conducted by: Dai/Traditional Birth Attendant (TBA)=1, Lady Health Visitor/Worker=2, Doctor=3, Nurses=4, Others=5 (also provide explanation if Others)
 Q10: Has the child been given anyone of the following along with breast feeding? Ghutti=1, Goat Milk=2, Bottle Fed=3, Water=4, Others=5 (Please explain if Others)

O. Vaccination & Diarrhoea (for Under 5 children)

11. Has the child been vaccinated? Yes=1 No=2 (if no → , Q19)										
12. Do you have Vaccination Card of your children with you? Yes=1 No=2										
13. Did the child vaccinated/administered the following drops. (1.Yes, according to Card, 2. Yes, according to memory, 3. yes, during polio campaign, No =4)										
1. BCG		2. DPT1		3. DPT2		4. DPT3				
5. POLIO1		6. POLIO2		7. POLIO2		8. POLIO3				
9. HB1		10. HB2		11. HB3		12. MEASLES				
14. Where / who and on what date the most recent vaccination was given? Govt. Hospital /dispensary doctor = 01 Basic Health Unit = 02 Rural Health Centre = 03 MCHC= 04 NGO, Health worker = 05 Lady Health Worker= 06 Vaccination team/campaign = 07 Private Practitioner / facility = 08 Other = 09 Don't know = 10										Date:
15. How many days after birth, did the child get first injection of BCG? If Don't know = 9										Code:
16. Did the child suffer from any of the following disease in spite of vaccination? Can use maximum of three options. Polio =1 Whooping Cough =2 Measles =3 Tetanus =4 Tuberculosis (TB) =5 Diphtheria =6 No =7 (maximum of three option code can be used)										Option1:
										Option2:
										Option3:
17. How far did you travel (round trip) to get your child vaccinated? 0 - 2 Km = 1 >2- 5 Km = 2 > 5-10 Km = 3 >10-20 Km= 4 >20 Km = 5 Don't Know=9										
18. How much Did you Pay for it (including transport)? if nothing Write zero →Next Child										
19. Why was the child not vaccinated? Cannot afford it = 1 No team has visited = 2 Facility too far away = 3 Don't know about vaccination=4 Child will get sick = 5 No female staff = 6 No answer= 7 Unnecessary= 8 Other= 9										
20. Did the child face diarrhoea during the last 30 days? Yes=1 No=2 (If no, then ask from the next child)										
21. Did you consult anyone for the treatment of diarrhoea? Yes=1 No=2 (If no, then ask Q. No. 23)										
22. Who was the person you consulted first of all? Private Dispensary/Hospital=1 Government Hospital=2 RHC/BHU=3 LHW=4 Nurse/LHV=5 Chemist/Pharmacy=6 Hakeem, Homoeopath, Waid =7 Other=8										
23. Did you give Nimkol (ORS) to him/her? Yes, readymade =1 Yes, Prepared at home=2 No=3										

³ Stunting - Moderate and severe - below minus two standard deviations from median *height for age* of reference population [http://www.unicef.org/infobycountry/stats_popup2.html].

⁴ Wasting - Moderate and severe - below minus two standard deviations from median *weight for height* of reference population [http://www.unicef.org/infobycountry/stats_popup2.html].
