## COVER STORY

# SUCCESS Provides Avenues for Improved Quality Life through Adult Literacy and Numeracy Skills (ALNS) Component

Launch of ALNS component on International Literacy Day, Karachi

A study by UNESCO shows that globally, 773 million youth and adults are deprived of living a quality life because of illiteracy. The data reflects that two-thirds of these 773 million people are women. Under the Sustainable Development Goal 4 (SDG 4)

literacy is an indispensable human right. Like other countries, Pakistan has also committed to SDG 4 and as such the Constitution of Pakistan promises access to quality education. However, 22.8 million school-going age

children between the ages of 5 – 16 years) are out of school in Pakistan. This illiteracy is primarily responsible for the slow development of rural communities of Pakistan.

## SUCCESS Launches Adult Literacy and Numeracy Skills (ALNS) Component as Pivotal Force for Improved Life

In the eight (08) Programme districts of SUCCESS in Sindh, two (02) million adults (77% of total adults) never attended school. The proportion of illiterate adults is higher among

female members (90%) and poor households (87%). Among school age children (5-6 years old), 66% of the boys and 79% of the girls were not in school.

Recognising this abysmal rate of literacy in Sindh, SUCCESS has launched the Adult Literacy and Numeracy Skills (ALNS) Component. The overarching

objective of the ALNS is to help female community leaders and beneficiaries under the Programme influence gender roles positively, facilitate them in mainstreaming their role for social and economic empowerment, and support them in their employment through self-initiatives. This component will help beneficiaries to manage the day-to-day affairs and records of their Community Institutions, and financial transaction with banks effectively. It will also aid them in pursuing other activities under the Programme, such as their income generating enterprises, self-employment initiative through vocational skills training and accessing micro loans and income generating grants.

On the International Literacy Day (8th September 2021), the EU-funded SUCCESS Programme in collaboration with the Directorate of Literacy & Non-Formal Education (L&NFE) Government of Sindh and Japan International Cooperation Association (JICA) launched Adult Literacy and Numeracy Skills (ALNS) component in Karachi. The event was well attended by stakeholders including the Government of Sindh, International donors, implementing partner RSPs and RSPN, NGOs working on education front, Local Support Organisation representatives and non-formal schoolchildren and teachers.

It was the formal launch for opening and operationalisation of 1440 Adult Literacy Centres for 35,000 learners by RSPN and its partner RSPs working in Sindh. Moreover, the Directorate of Literacy & Non-Formal Education (L&NFE) Government of Sindh programme will open and operationalise 3,000 NFE centres in five districts of Sindh.

TRDP Adult Literacy Launching

Minister of Sindh for Culture, Tourism, and Antiquities and Education at the event highlighted the significance of literacy and meeting the SGDs targets. He emphasised on need for accelerating the educational activities to achieve maximum literacy rate. The Director, Directorate L&NFE mentioned enrolment of 695 women in 25 centres as of now. The ratio of enrolment has increased up to 60 women in a month. Over 500 learners have recently graduated from the non-formal education and

received equivalency certificates.

Non-formal school teachers and children performed a skit highlighting the problems faced by poor households in seeking formal education and how non-formal schools by L&NFE are educating the adults (over 16 years) who are not eligible to get formal education.

On 9<sup>th</sup> September, Thardeep Rural Development Programme (TRDP) inaugurated the first Adult Literacy Centre in district Jamshoro. Director L&NFE, Government of Sindh, Chairman National Commission for Human Development (NCHD), representatives from Implementing Partners (IPs), members of community institutions participated in the event and shared thoughts on significance and effectiveness of the adult literacy component among the community.

## Key Learnings from ALNS under SUCCESS Programme

- Poverty reduction is essential for shifting the focus from survival to quality of life through education.
- It is imperative to further sensitise and mobilise public to opt for adult literacy component (through non-formal education). Enrolling women in non-formal literacy programme would serve as beacon light for the community at large through chain effect.
- Inclusion of the marginalised and destitute population (regardless of age) in education will improve their socio-economic life patterns.
- Basic literacy skills are vital to women leaders to manage the day-to-day affairs of their community institutions and financial transactions with banks effectively (under the SUCCESS Programme).

## HIGHLIGHTS

### Balochistan Rural Development and Community Empowerment (BRACE) Programme

In the fifth year of the EU-funded BRACE Programme, there is increased focus on assessing the impact of the project in the target districts of Balochistan. As such, a third party independent thematic study was completed in the quarter iterating the importance and impact of

BRACE Programme's interventions since the inception of the project via a third-party assessment for impartial findings. These interventions include Community Investment Fund (CIF), Income Generating Grants (IGG), Technical and Vocational Education and Training (TVET).

RSPN is also conducting a longitudinal study on the dynamics of poverty. The second wave of this Participatory Action Research (PAR) has been completed by Momentum Ventures. Key findings for the study showcase the following:

### Poverty Push and Pull Factors

A major finding from wave II is that there has been an 8% decrease of people in poor category that is households with (0-23) poverty score, consequently 8% increase in the non-poor (0-24) band. The research reports that human

resource development, women employment and small-scale businesses are reportedly major contributors in pulling people out of poverty. On the other hand, the negative impact of COVID-19 on livelihoods has been reported during wave II.

Health expenses, increased rate of inflation, decrease in income, and added loans are the factors which have significantly contributed to pushing people into poverty. These findings reflect the impact of macro level factors at the household level.

## Women Empowerment

Women empowerment indicators under the study have been divided into four categories. '*Power from within*'; this includes self-esteem, self-confidence and personal autonomy. The second category is '*power to*'; this includes access to information, household decision making, financial

literacy and influence in governing community institutions (CI's). The third indicator is '*power with*' which includes variables, e.g., social capital, participation in CI's and support from groups. In all these three indicators, there has been a positive change in districts Khuzdar and Kech with

exception of Loralai. The fourth indicator is '*power over*' which includes political participation and influence in governing CI's; there has been no change in these indicators. The third-party study reports men's increased support of women rights and change in attitude and beliefs inside household.

### Case study

## Inclusion of Widows under the BRACE Programme in Balochistan

BRACE Programme follows an inclusive approach so that the deserving from all segments of the community are supported to improve their condition.

Raheema, widowed for the last five years, lives with her only son. She is a member of the Community Organisation Bitulfut from Village Bhit in Union Council Bhalonk of District Khuzdar.

As one of the poorest members of her community, she received three goats as an Income Generating Grant in October 2019 with the help of Balochistan Rural Support Programme (BRSP). She and her son worked hard to nourish their livestock and increase the number of goats from three to eight. She then sold a two of the goats when she needed cash. She still maintains six of them which she plans on increasing the goat herd size. Other than adding to her income, the goats have also contributed to improved nutritious diet for the family.. Raheema happily declared that those goats were tremendous asset for her and a source of support to her family's livelihoods.

# Programme for Improved Nutrition in Sindh - ER3

## PINS ER-3 Enters its No-Cost Extension Period

As PINS ER-3 entered its no-cost extension period, the entire PINS ER-3 team including partner RSPs got together to comprehensively plan for the extension period. The three-day workshop, held between 12-14 July, reflected on the Programme teams' experiences to determine improvements that can be made. The workshop identified barriers and constraints faced in the

past years of the Programme, prepared detailed implementation and financial spending plans, and focused on the significant findings and observations from the Monitoring and Evaluation team that need to be addressed in the upcoming implementation period.

The workshop hosted Mr Kamran Naeem, WASH Specialist at UNICEF who

conducted a highly relevant and informative session on the development of social norms. The participants were also addressed by Mr. Jamal Mustafa Qazi, Programme Coordinator for the Accelerated Action Plan, who gave a powerful and resonant message that the work of the AAP and support from PINS continues to be vital to the needs of rural families in Sindh.

### Case study

#### How Musmat is Working to Ensure her Community Makes Better Food Choices

When Musmat became a mother for the first time at 19, she made a commitment to her son – that she would do everything in her power to educate him and whoever came along after. Now, at 41, she stands proud with her 8 children, the eldest of whom has recently enrolled to pursue his undergraduate studies.

Her journey has been tough. Her husband Qurban Ali continues to be ill after a serious heart attack several years ago, and his income as a driver, already low, dropped significantly during the COVID-19 pandemic. Musmat has increasingly taken over the financial reins of her family. Two years ago, she established a shop in her village Kher Muhammad Mugheri in Dadu, by extending her house. She started selling eggs, milk, yogurt, seasonal vegetables and surplus seeds from the Farmer Field School (FFS) at VO Sada Bahar that she manages under the PINS ER3 Programme . She earns between PKR 10-15 thousand per month. Her profits are all invested in educating her children.

'I was known for the yoghurt that I made. And the eggs. I am known for taking good care of my chickens and it shows! I am becoming famous for my seeds, as more and more people are cultivating their kitchen gardens, as we taught them at the FFS.'

Musmat is one of the 7 Female Agriculture Entrepreneurs (AEs) in Dadu to receive a grant under PINS. With it, she will extend her shop and stock more food staples. 'We learnt about a healthy diet during the community (awareness) sessions and I want to be someone who gives people options so that they are able to actually eat healthier and not struggle going to the market or bargain there.'

Musmat believes mothers oversee household food choices. Through her shop, she wants to have a wider conversation with these mothers on making better food choices by helping them understand that their children's health is key to their reaching full potential.

## PINS ER3 Performance Against KPIs

As of September 2021

**1,514**

VOs Certified Open Defecation Free by District ODF Committees

**97**

Rain-Harvesting Ponds/Tanks Constructed/Rehabilitated

**9,047**

Over PKR 270 Million Given in Grants of PKR 30,000 to HHs to Purchase Goats

**43**

Over 6.8 Million to be Given in Grants (ranging between PKR 30,000 to 50,000) to Female Agriculture Entrepreneurs to Improve Access To Balanced And Affordable Foods

**2,079**

Over PKR 22 Million Given in Grants of PKR 10,600 to HHs for Latrine Construction

# Programme for Improved Nutrition in Sindh – PINS ER2 (SRSO)

Malnutrition in Sindh province of Pakistan is a silent catastrophe affecting nearly half of children and mothers. The Government of Sindh is taking notice of the situation and has launched a large scale Program for the Improved Nutrition in Sindh (PINS) from 2018 with financial support of European

Union (EU). Under the ACF-led Nutrition Specific Component of PINS, RSPN is providing outreach services through its partner organization SRSO in three districts of Sindh province namely Shikarpur, Larkana and Kambar Shahdadkot with technical support of ACF. For this purpose, RSPN partner

organization deployed 34 Community Health Supervisors (CHSs) and 1,437 Community Health Workers (CHWs) in all three districts to screen outreach Lady Health Workers (LHWs) uncovered population. The programme team achieved below indicators in current outreach period.

## Key Programme Highlights - Sep 2021

- **33,659** of new children **6-59 months** of age screened and **554,734 children** rescreened again in current quarter.
- In the result of screening, the **9,275** were identified in Severe Acute Malnutrition (SAM) and out of them **7,357** were enrolled successfully at BHUs and Health Facilities.
- Out of the new screening, **19,529 Moderate Acute Malnourished (MAM) children** aged **06-59 months** were given Multi Micronutrient Powder (MNP) sachets. All other rescreened children were also provided follow ups of multi micronutrient powder (MNP) sachets.
- A total of **30,531 new Pregnant and Lactating Women (PLW)** were screened by CHWs and **219,997** of PLW rescreening were also held. **41,156** newly PLWs were provided iron folic acid (IFA) tablets and **156,283** were given follow ups too.
- For the social behavior change communication, the **11,825 session** with mother to mother groups and **2782 session** with father to father groups were conducted successfully.
- While to strengthen the liaising with partners and government line departments, **09 district** liaising groups (DLGs) and 03 District Coordination Committee for Nutrition (DCCN) meeting were held under supervision of ACF international team. Addition to this, 02 Quarterly Review Meetings (QRM) were also held in this quarter to check the progress status and plan remaining activities.
- The PINS ER-2 team also facilitated donor visits and joint monitoring visit in all three targeted districts.

## Case Study

### Ms. Saeeda's Efforts for Healthy Children in Sindh

On dated April, 15<sup>th</sup> 2021 in the field visit of village Murad Wahan, CHW Ms. Saeeda went to Zahida's house to screen her under five year children baby Bushra and little Mustafa and got that Mustafa with age of seven months found in status of Severe Acute Malnutrition (SAM) having 9.3 cm MUAC and 5.0 kg weight. The mother provided history of child and informed to CHW that Mustafa was very weak by birth and he used to be sick often. The parents of child are not educated and do not have appropriate awareness and knowledge about balanced diet for children. Other factors also affected the mother, and she was not able to feed her child on time, as she is a house wife and have lot of work to do at her home and on farm. Family is also financially poor, so could not afford nutritious diet for their children.

While child Mustafa was referred to the OTP site of Murad Wahan immediately and enrolled on the same day with OTP # 453. After admission, Nutrition Assistant (NA) started the provision of RUTF as per programme protocol. On every follow-up visit Nutrition Assistant Ms. Sumaira Mangi was checking child MUAC and weight, which was indicating that he is improving day by day. On child Mustafa's 8th visit, he improved and gained 12.6 cm MUAC and 7.2 kg weight in time period of 02 months and his status changed from SAM to MAM.

Now CHW Ms. Saeeda started counselling sessions of parents on balanced diet and proper usage of "Micro Nutrient Powder" (MNP) with daily meals of child. The parents are recently utilizing local available nutritious food for their children, and this is leading to improved health of their children.

# Programme for Improved Nutrition in Sindh – ER 2 – Districts Dadu & Jamshoro

Nutrition Specific Component for Programme for Improved Nutrition in Sindh (PINS) contributes to SDG goal 2 target indicator 2 which is end all forms of malnutrition. Major beneficiaries of the project include Pregnant and Lactating Women (PLW) and children under the age of 5 years. It addresses malnutrition among women and children through a standard metric for called Mid Upper Arm Circumference (MUAC) measurement.

Trained Community Health Workers (CHWs) identify women and children who fall under various categories of malnutrition including PLW with MUAC less than 21cm, Severely Acute Malnutrition (SAM), Moderately Acute Malnutrition

(MAM) and normal children. Interventions for PLW include referrals of PLW to health facilities for anaemia, antenatal and postnatal care as well as treatment at basic health facilities and provision of IFA tablets. Interventions for children include; treatment of at Outpatient Therapeutic Programme (OTP) provided to SAM children. Whereas MAM and normal children aged 6-23 months are provided MNP supplementation to address micronutrient deficiencies at an early stage.

Alongside treatment and referrals, the project is heavily focused on raising awareness through Social Behavioural Change Communication (SBCC). As of now, 100% of Mother To

Mother Support Groups and 81% Father To Father Support Groups have been formed. Monthly sessions are conducted with these groups to raise awareness and discuss nutrition related issues and how they can be addressed. The multi-sectoral approach of the interventions allows a contextual understanding of issues and finding local solutions to problems.

Since the inception, 123,715 children have been assessed at the OTPs. There have also been significant cross-referrals for immunization. The knowledge impact can be observed during multiple interviews of beneficiaries conducted over project duration.

## Case Study

### Saving Sadoro from SAM

Zulekha resident of village Gulab Palari in Taluka Thano Bula Khan recalls her hopelessness. She shared that her child Sadoro was severely acute malnourished and had oedema which is a medical complication. She took the child to several private hospitals and lost hope due to his deteriorating condition. Nothing seemed to change.

CHW Khadija working in her village, identified and referred her child for treatment at OTP Sari. Now, the child's treatment is complete and he is on the road to recovery.

She thanks the project intervention and points out that she was previously concerned about her child but did not know where to go. With the help of community health worker, she was able to identify the issue and convince her family to take her child for treatment. She has been regular with her follow ups and can observe significant improvement in her child's health. She also iterates that through awareness sessions she has learnt that it is also important for women to focus on their health in order for child to be healthy. She engages in discussion with other women in her community and counsels them to go to health facilities.

# Community Engagement for Promotion of Reproductive Health Rights (RHR) of Youth and Improve their Access to Reproductive Health (RH) Services Under UNFPA's Sehatmand Khandan Project

Imagine meeting a young girl who tells you she was married at the age of 12. Or a boy who says he had to leave school to earn for the family. Or another adolescent who says he/she was abused but was asked to not tell it to anyone. Imagine the lives of such adolescents who later grow up to be individuals with poor health outcomes and reduced opportunity to participate in the family and society's overall wellbeing. 67.5% of the whole population of Sindh constitutes youth and adolescents. less or no information given at schools about body development paves

ways for myths and fears about reproductive health among this age cohort. One in five girls get married before reaching the age of 18. A healthy transition into adulthood is key to helping youth and adolescents make informed decisions about their reproductive health.

Under the UNFPA's Sehat Mand Khaandaan Project, RSPN implements Community Engagement for Promotion of Reproductive Health Rights (RHR) of Youth and Improve their Access to Reproductive Health (RH) Services, in district Matiari through NRSP, and Kamber Shahdadkot through

SRSO. The aim is to create an enabling environment at community level for promotion of Reproductive Health Rights (RHR) of Youth, and ensure youth are better informed about their RHR and have improved access to Reproductive Health services. The overall objective is to contribute in UNFPA's effort to Support policy initiatives and advocacy for increased investment in marginalized young people, including access to Sexual and Reproductive Health Rights (SRHR). As of Sep 2021, the following key activities have been carried out.

## Project's Key Highlights

### 10 LSOs, and 101 VOs

oriented on RHR issues of youth and adolescents and the role they can play in promoting RHR of youth at the community level

### 332 Youth Champions (50% girls) identified and integrated into LSOs/VOs as Youth Subcommittees.

These YCs are trained on RHR toolkit, and with support from LSOs/VOs, will conduct sessions with adolescents of their assigned population on RHR. The YCs also attend monthly meetings of LSOs/VOs to highlight RHR issues of youth and seek community support for their resolution

### 10 Adolescent and Youth Friendly Space (AYFS) established

in both districts. The spaces are used to promote RHR of youth by engaging community youth and adolescents, and parents, and also organize camps on birth spacing for married youth and adolescents. A total of 6 FP camps have been organized for married adolescents at 6 AYFS, with support from PWD

# Delivering Accelerated Family Planning in Pakistan (DAFPAK)

## Knowledge Is Power

Along a narrow path veering off of the main highway, Chak 117 of Bahawalpur is a colourful assortment of brick houses, dirt roads and green fields. Outside of one particular home, where the village's Community Resource Person (CRP) Abida Parveen lives, children fed tethered goats hay, while the cats teased the children, lounging playfully on the mud walls, just out of reach.

Abida, 48, would leave early in the morning for her rounds under the DAFPAK family planning project, register in hand and ready to work with households in her community. Through her regular tours of her neighbourhood, she had begun to establish a close relationship with many of her peers. However, while her counselling on the benefits of birth spacing did touch the lives of many women in the community, not everyone heard her voice or agreed with her. This was especially true for an 18-year old woman in the community, Hina Asghar.

Hina married her husband at the young age of 17. She became pregnant shortly after. When Abida first visited Hina's husband's house in February, she was informed that the young, expecting mother was not home. Hina was to have a

home birth at her parent's house in a different Chak, where she would spend a significant period along with her new born directly afterwards as well.

Abida and Hina's first counselling session actually came many months later - and sparked a budding friendship between the two.

Today, Hina was visiting Abida with her 10-month old daughter Maryam. The two sat at the edge of a bed, Hina cradling her baby in her lap. "I am very grateful to Abida for her counselling on birth spacing," Hina said. "My husband and I were overjoyed at the birth of our daughter...but I know how keen he is on having a son. Right after I had Maryam, he brought up the next pregnancy. I am happy with growing my family eventually, but not right now. The thought of experiencing another pregnancy all over again was very overwhelming", she shared as she cradled an upset Maryam.

Abida interjected, "I knew Hina had recently gotten married, and that too very young. It wasn't easy to get her to speak with me - her mother-in-law and her husband had not passed along the message that I had been dropping by in the hopes of speaking with her."

"That's correct," Hina agreed. "I wasn't in the village, and my husband's family had not prioritized passing along the news of Abida's visits. I learnt that she had been looking for me when a neighbour of mine who was visiting my parents' village, mentioned it and suggested I get in touch with the CRP to discuss my options," she explained, breaking apart a biscuit that had her daughter's attention.

"When I finally met her, I could tell Hina was worried about getting pregnant again. So I spoke to her husband and mother-in-law on how birth spacing benefits both mother and child. After a bunch of questions, they relented and agreed it would be better for Hina to avail the service." Abida said. "I gave Hina a referral slip to present at the next health camp, and recommended her to look into long-term methods," she added.

Hina nodded in agreement and shared, "At the camp I presented my slip and opted for the injection method, that offers 3 months' worth of protection. I recently received my second shot, and plan to space out my next pregnancy by 5 years - this will allow me to focus on raising my daughter while my husband works towards a more secure future for us."

Note: \* This RSP quarterly SM outreach is fully aligned with the population & household census of 2017 where all districts' 1998 and PSC census data replaced with latest rural household numbers in all districts except districts of AJK and GB as PBS still not released the census results.

Note: \*\* The 149 include all Newly Merged Districts (NMDs) of KP province were previously known as FATA agencies and FR areas. These newly merged districts will be integrated in to the KP province once the UC and district level PBS census 2017 is available.

\* The total figure for districts/areas and union councils excludes 37 overlapping districts (presence of multiple RSP) and 933 overlapping union councils.

+ Data pertaining to AJKRSP updated as at March 2013 and AKRSP updated SM outreach data of newly formed districts of Shigar, Kharmang and Nagar after separating numbers reported in previously affiliated districts.

# Overall 2 UCs coverage increased during reporting period ie Apr-Jun 2021. SRSO aligned its SM outreach with the GoS-PPRP and EU-SUCCESS Programmes where over-reporting of UCs and households has been resolved in last reporting period of Jan-Mar 2021.

- Source: correspondence with Programme Manager, Gender & Development, AKRSP on reporting 20,000 women have gained literacy under AKRSP's adult literacy programme.

## WHO WE ARE

The Rural Support Programmes Network is the largest development network of Pakistan, with an outreach to over 48.9 million rural Pakistanis. It consists of 10 member Rural Support Programmes (RSPs) that espouse a common approach to rural development: social mobilisation. Social mobilisation centres around the belief that poor people have an innate potential to help themselves, that they can better manage their limited resources if they organise and are provided technical and financial support. The RSPs provide social guidance, and technical and financial assistance to the rural poor. RSPN is the strategic platform for the RSPs: it provides capacity building support to them, and assists them in policy advocacy and donor linkages.

This publication has been produced with the assistance of the European Union. The contents of this publication are the sole responsibility of Rural Support Programmes Network (RSPN) and can in no way be taken to reflect the views of the European Union.
