

Noor Jan Contributes towards her Family's Wellbeing

Noor Jan, a mother of 10 children, lives in KunchitiKech of Balochistan. Her husband is a daily wage labourer. She says, "The eldest two sons also work in construction work as it has hard for my husband to fulfil the needs of growing family. However, they seldom find work and in times of pandemic it was even more uncertain. The younger two, a daughter and a son, study in grad 10 and 12 respectively.

After getting a grant support of PKR 33,400 from NRSP, she purchased two goats. She said, "At the time of purchasing both goats were pregnant. They delivered two offspring after two months of receiving the grant. We have a smooth milk consumption in family since then." She has reared them with care. With no mortality, now we have four goats and one them is expected to deliver an offspring soon. She is quite hopeful that after selling two offspring, she will start a shop for one of her sons and continue both activities to improve the family's livelihood.
